Zafar Iqubal

FullStack Developer

Phone: 7992257064

Address: Gijhore ,Sector 53 Noida UP

Website: https://zafariqubalportfolio.netlify.app/

Email: ziqubaldev@gmail.com

Highly skilled and motivated Full Stack Developer with 2 years of experience in .NET backend development and Angular and MVC front-end development. Committed to delivering efficient and robust solutions, I seek opportunities to leverage my expertise in creating innovative web applications and contributing to the success of dynamic development teams.

EXPERIENCE

MTSL   *07/2022-present*

Software Engineer

Full Stack Developer

• Collaborated with cross-functional teams to design, develop, and implement scalable and performant web applications.

• Utilized .NET Core and ASP.NET MVC to create robust and efficient backend services, handling RESTful APIs and data processing.

• Implemented authentication and authorization features using JWT token, ensuring secure access to various application modules.

• Developed responsive and user-friendly front-end interfaces using Angular, HTML and CSS ensuring a seamless user experience across devices.

• Optimized application performance through code refactoring and database query optimization, leading to a 20% improvement in overall response time.

• Conducted thorough testing and debugging to identify and resolve bugs, ensuring a stable and reliable application.

• Actively participated in code reviews, providing constructive feedback to team members to maintain code quality and standards

• Implemented security in APIs with windows authentication or data base authentication and authorize with the authorization token using jwt token.

• Implemented security in APIs with role based access with help azure ad authenticating user with azure and authorization with azure based generated token.

MTSL   *03/2022-06/2022*

Engineer Trainee

• Assisted in the design and development of a web-based Contract management system using .NET technologies.

• Collaborated with senior developers to implement front-end features and functionalities, ensuring a seamless user experience.

• Contributed to the development of RESTful APIs and backend services, supporting various application modules.

• Conducted unit testing to verify the accuracy and functionality of newly developed code.

SKILLS

• **Programming languages** : C#, JAVA, JAVASCRIPT, TYPESCRIPT

• **Technology** : .NET Core (api, mvc), .NET Framework, Angular, HTML , CSS ,Web APIs, Dapper ,Azure AD

• **Database**: SQL Server,My SQL

• **Version Control** :Git

• **Development Tools** : Visual Studio, VS Code, npm , Nuget

PROJECTS

APDS   *07/2022-12/2022*

Description : It is a project for the cruise ship for maintaining the records of passengers ship safety drills.

Frontend : Angular ,TypeScript, JAVASCRIPT,HTML, CSS, Bootstrap, Prime NG

Backend : c#, .Net core , Entity Framework ,Restful APIs Database : SQL Server
Role : Application development, Security Implementation ,Debugging, Project Maintenance, Unit testing
Database Operations : Created Tables written SQL queries as per the project requirement

Restauran Master

01/2023-05/2023

Description : Migration of VB6.0 legacy project to latest .NET Core MVC using C#. Technology Used:

Frontend : MVC, HTML, JAVASCRIPT, CSS, Kendo UI, Bootstrap

Backend : C#, .NET Core, Dapper Micro ORM, Restful APIs

Database: SQL Server

Database Operations : Created Tables written SQL queries as per the project requirement Build a Web Api .net core 6.0 using Dapper for the database interaction.

Role: Application development, Debugging, Security Implementation, Project Maintenance, Unit testing

Financing Statements

05/2023-09/2023

Description : Migration of VB6.0 legacy project to latest .NET Core MVC using C#.

Technology Used:

Frontend : MVC, HTML, JAVASCRIPT, CSS, Kendo UI, Bootstrap

Backend : C#, .NET Core, Dapper Micro ORM, Restful APIs

Database: SQL Server

Database Operations : Created Tables written SQL queries as per the project requirement Build a Web Api .net core 6.0 using Dapper for the database interaction.

Role: Application development, Debugging, Security Implementation, Project Maintenance, Unit testing

FileWatcher Service

10/2023-present

Description : It is console application running as service in the background where it will keep the record any file which is expected on that to come or not
it came on time or late or the file not came got missing.

Technology Used:

.NET core, c#, ADO.NET,

Database: SQL Server

Database Operations : Created Tables written SQL queries as per the project requirement

Role: Application development, Debugging, Security Implementation, Project Maintenance, Unit testing

SplitWise Clone

Frontend Angular : https://github.com/zafariqubal19/SplitWiseAngular

Backend .NET Core : https://github.com/zafariqubal19/SplitWise

Description : It is clone app of splitwise app where it application splits the expenses of the group

Technology Used:

Frontend : Angular ,TypeScript, JAVASCRIPT,HTML, CSS, Bootstrap

Backend : C#, .NET Core, ADO.NET, Restful APIs

Database: SQL Server

Database Operations : Created Tables written SQL queries as per the project requirement Build a Web Api .net core 6.0 using ADO.NET for the database interaction

Role: Application development, Debugging, Security Implementation, Project Maintenance, Unit testing
